REMARKS

The Quayle Action mailed September 19, 2007, has been carefully reviewed and Applicant notes with appreciation the identification of allowed subject matter.

By this Amendment, Applicant has amended the specification. Claims 13-24 are pending in the application and are allowed.

The Examiner objected to the incorporation by reference of two foreign applications or patents, and required correction thereof.

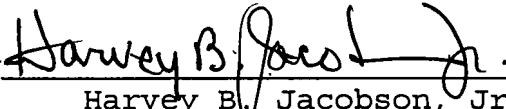

The specification has been amended to delete the references to the two Swedish patent applications and to insert in place thereof references to the two issued U.S. patents which correspond with the previously referenced foreign applications. Specifically, Swedish patent application 0101661-7, previously referenced on page 1, corresponds to U.S. Patent No. 6,850,186, now incorporated by reference. Similarly, Swedish patent application 0101662-5, previously referenced on page 3, corresponds with U.S. Patent No. 6,954,404, now incorporated by reference. As the two issued U.S. patents noted herein and added to the specification correspond in content with the foreign applications, no new matter has been added.

Respectfully submitted,
